### **Abstract**

Imam Kia Harasi has put a lot of effort into interpretation of the Holy Quran and preference among interpretation opinions. Due to the original and symmetrical citations retrieved from his interpretive and principled ideas, his book is one of the most important juridical interpretations books. Using paradigms for preferring interpreting opinions, which are seen in his book of Islamic rules, indicates his power and ability of processing and analyzing Quranic subjects. In this book, for selecting and preferring the words, Kia Harasi cited the preferred aspects like Quranic analogue, tradition of the Prophet, the rule of Quranic emergence and common words, and he used all these aspects in their proper and correct place and in a relatively precise manner.
